## SUMMARY

Full Stack Developer with 3+ years of experience building scalable and high-performance web applications. Skilled in both front-end and back-end development, with a proven track record of integrating systems and optimizing user experiences. Passionate about delivering clean, maintainable code and collaborating in Agile teams to drive innovation and continuous improvement.

## TECHNICAL SKILLS

- **Frontend:** JavaScript, Next.js, React.js, Redux, TypeScript, Gatsby, GraphQL.
- **Backend:** Node.js, Express.js, REST APIs, Drupal CMS, PHP.
- **Styling:** Tailwind, Styled components, CSS modules, SCSS.
- **DevOps:** AWS, Docker, Cloudflare, Microsoft Azure services.
- **Database:** MongoDB, MySQL, PostgreSQL.
- **GenAI:** Claude, ChatGPT, RAG, v0.dev, AI Agents, MCP.

## EXPERIENCE

### Full Stack Engineer - QED42 | April 2023 - Present

- Led development of an EdTech platform using Next.js and Drupal CMS for a renowned non-profit, from inception to deployment.
- Designed and implemented scalable architecture, driving significant user growth and reliability.
- Built and maintained high-performance React.js (with Hooks), Redux, and GraphQL applications integrated with REST APIs and Drupal CMS.
- Improved initial render performance using lazy loading, code splitting, and SSR optimizations.
- Mentored interns in full-stack development best practices, contributing to team-wide improvements in code quality and onboarding.

### Associate Engineer - Full Stack - QED42 | May 2022 - March 2023

- Built reusable React.js components using Hooks and Context API for an eCommerce platform powered by Gatsby and Headless Drupal.
- Integrated Gatsby frontend with Drupal Commerce backend, enabling 90% real-time product data synchronization.
- Reduced page load times by 25% through performance optimizations, including code splitting and query tuning.
- Led internal training sessions on React.js and Headless Drupal architecture, boosting team proficiency.

### Intern - QED42 | Aug 2021 - April 2022

- Trained in React.js and Drupal CMS, building foundational expertise in full-stack web development.
- Gained hands-on experience in Drupal site building, theming, and custom module development.
- Contributed to the Drupal Open Source community, earning public credits on official project repositories.
- Developed internal projects using React and Headless Drupal, improving content workflows and interactivity.

## PROJECTS

### DevConnector - [GitHub](#)

#### Tech Stack - MERN.

- Built a full-stack social platform enabling developer profiles, posts, and community engagement.
- Designed responsive UI and managed application state with Redux for seamless UX.
- Developed secure authentication and integrated GitHub API for dynamic profile content.

### Name My Variable (VS Code Extension) - [Name my variable](#)

#### Tech Stack - TypeScript, Groq, VS Code API.

- Built and published a lightweight AI-powered VS Code extension that generates context-aware variable and function names from selected code.
- Designed to help developers improve naming consistency and code readability.
